Tippit reconstruction
Evidence Frameup
Martin, John, Jr.

When re-interviewed by the FBI, Martin told of seeing a man he believes was LHO leaving the immediate area in a cab, going South on Houston, which is what he would have been doing if Elm was still blocked, to get onto the expressway to Oak Cliffs. He describes the shirt Oswald was wearing.

This makes it very strange, much as Whaley needed buffering, that he was not called as a witness to testify to this, more so because he had movies. But the movies themselves are enough to have kept him off the stand, for they exculpate Oswald.

The time is not consistent with the rigged reconstruction, either, another possible reason he was not used as a witness.
